ModelScope × UPH × PCL × MetaC · Campus AI Co-Creation Competition· PARTICIPANT GUIDE

Everything a first-time participant needs before the competition workflow begins: create your account with email sign-up, record the username and email the organizers need, activate the account from your inbox, complete the email verification, and then bind your Alibaba Cloud International account. Five steps, about ten minutes.

Before You Start

- **Register with your email address.** Do not use Google / GitHub sign-in: the organizers need a **username + email** pair to identify your entry, and email sign-up is the only path that gives you both.
- **Record your username and email** the moment you create the account, then send them to the competition organizers. Use the **registration record** table below to keep them in one place.
- Use a mailbox you can open immediately. ModelScope sends **two emails**: an activation link right after signing up, and a 6-digit verification code later.
- Keep your **username, email and password** safe — you need the email and password every time you log in.
- Prepare an **Alibaba Cloud International account**. You can bind it as soon as the email verification is done; that binding is the next step of the competition workflow.

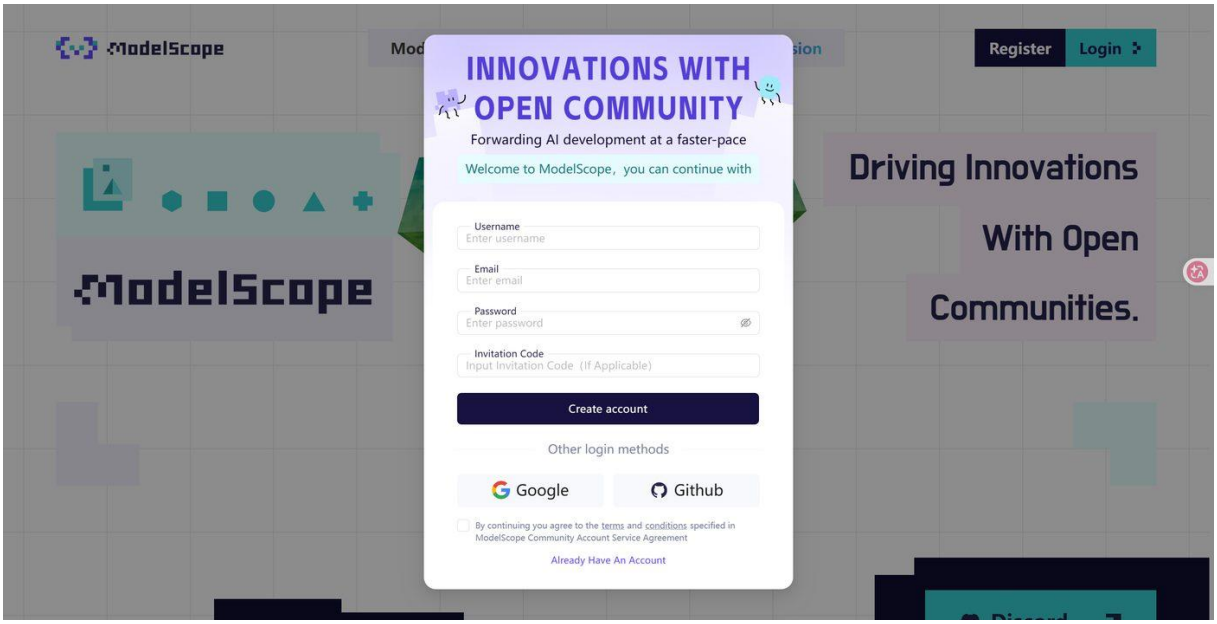

The Flow at a Glance

Step	Action	Outcome
1. Register	Create an account with username + email + password	Account created
2. Activate	Click the activation link in the ModelScope email	Email address confirmed
3. Log in	Sign in with your email and password	Access to the ModelScope workspace
4. Verify	Enter the 6-digit code sent to your inbox	Account verified (✓ verified)
5. Bind	Bind your Alibaba Cloud International account	Free cloud resources unlocked

STEP 1 · Create Your Account with Email

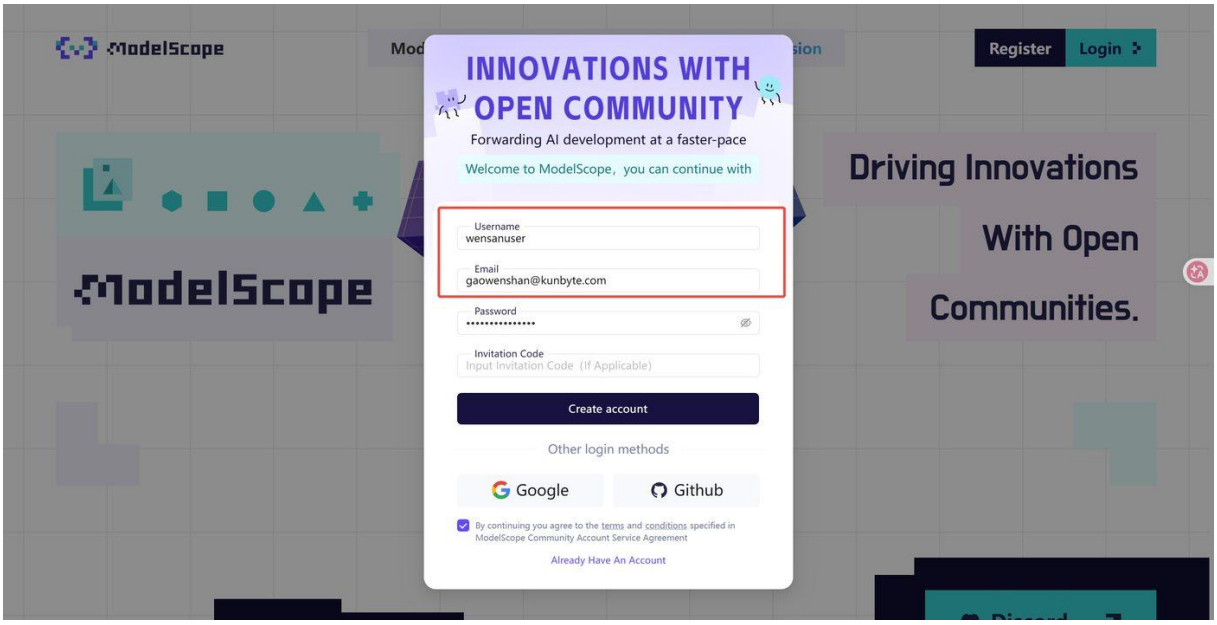

Where: modelscope.ai — click the Register button in the top-right corner.

1. Open `modelscope.ai` and click **Register** (top-right corner). The sign-up panel has four fields: **Username**, **Email**, **Password**, and **Invitation Code** (optional). Google and GitHub sign-in are also offered under "Other login methods" — skip them for this competition.

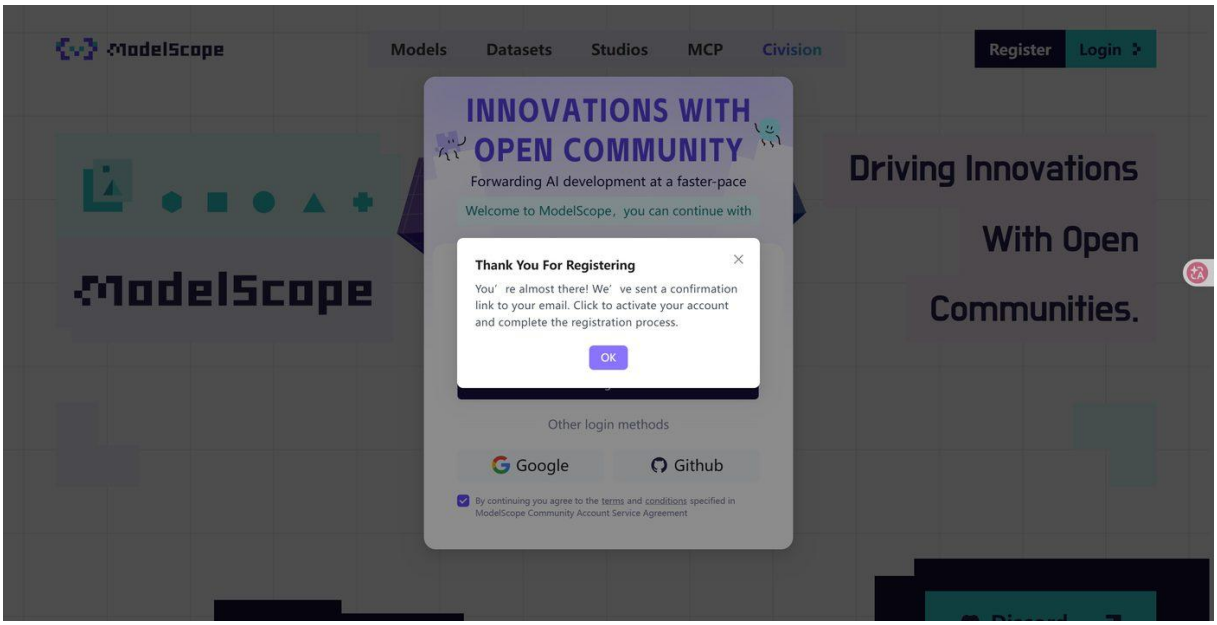

The registration panel — Username, Email, Password and Invitation Code

2. Fill in your **username**, **email** and **password**. Leave *Invitation Code* empty unless the organizers gave you one.

Fill in your username and email — these two values are the ones you must record

3. Click **Create account**. A **"Thank You For Registering"** dialog appears: "*You're almost there! We've sent a confirmation link to your email. Click to activate your account and complete the registration process.*" Click **OK**

The confirmation dialog — an activation link has been sent to your email

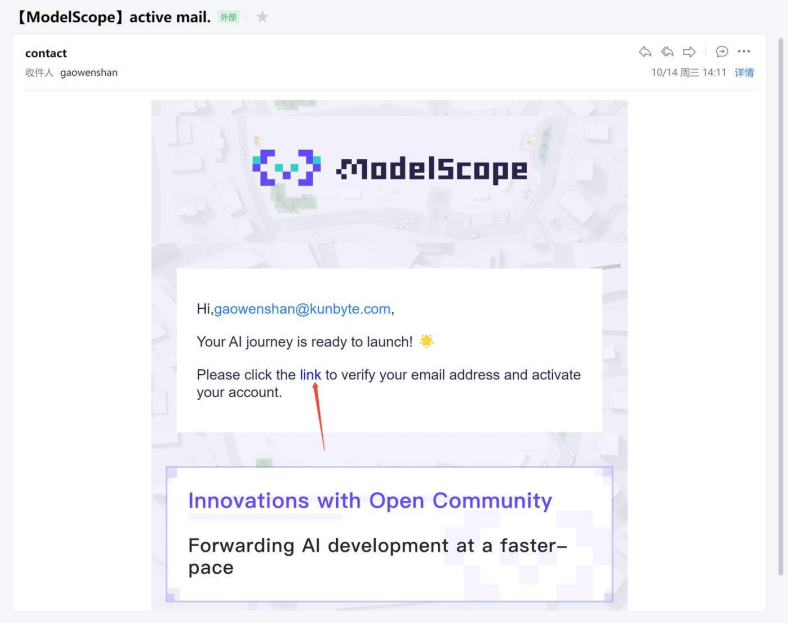

> **Record your username and email now.** Write both down and send them to the competition organizers — they are used to identify your entry. Fill in the table below and keep it together with your submission materials.

Item	Your value
ModelScope username	(fill in)
ModelScope email	(fill in)
Date of registration	(fill in)

STEP 2 · Activate Your Account from the Email

Where: the inbox of the email address you just registered with.

1. Open the ModelScope email with the subject **[ModelScope] active mail.** It reads: "*Hi, <your email>, Your AI journey is ready to launch! Please click the link to verify your email address and activate your account.*"

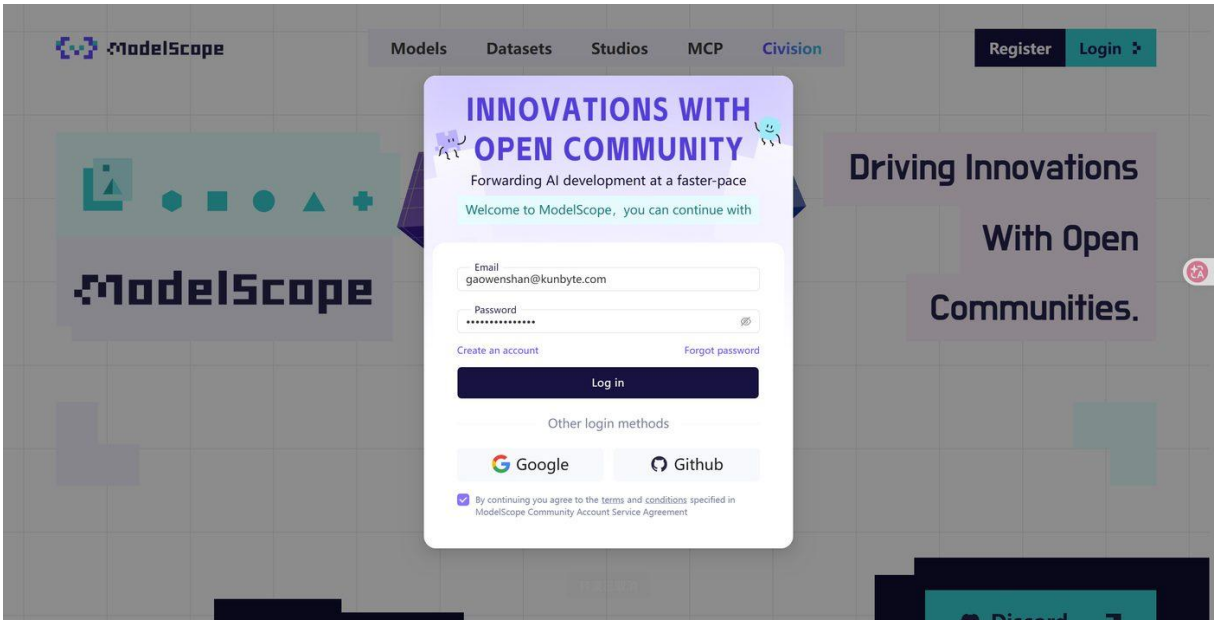

The activation email — click the verification link to activate your account

2. Click that link. Your email address is confirmed and the account is activated. If the email does not arrive, check the spam folder and make sure you typed the address correctly when registering.

STEP 3 · Log In to ModelScope

Where: modelscope.ai — click Login in the top-right corner.

1. Click **Login**, enter your **email** and **password**, then click **Log in**.

The login panel — sign in with your email and password

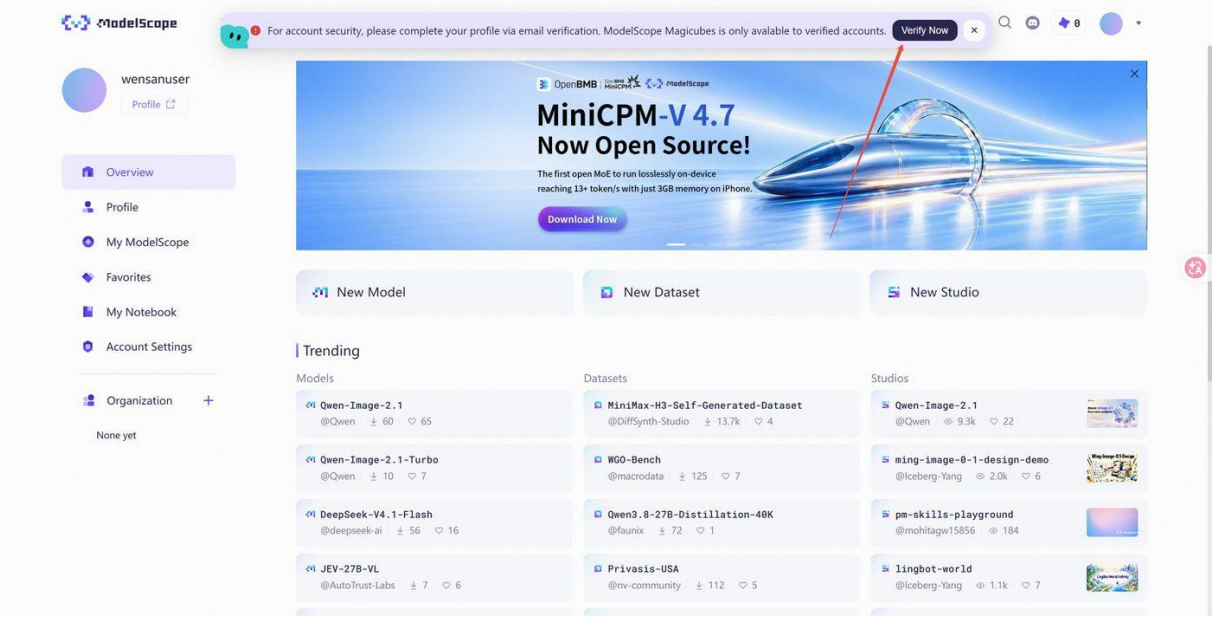

2. Forgot the password? Use **Forgot password** on the same panel to reset it by email. To create another account later, use **Create an account**.

STEP 4 · Complete Email Verification

Where: your avatar (top-right) → Settings → Basic Information.

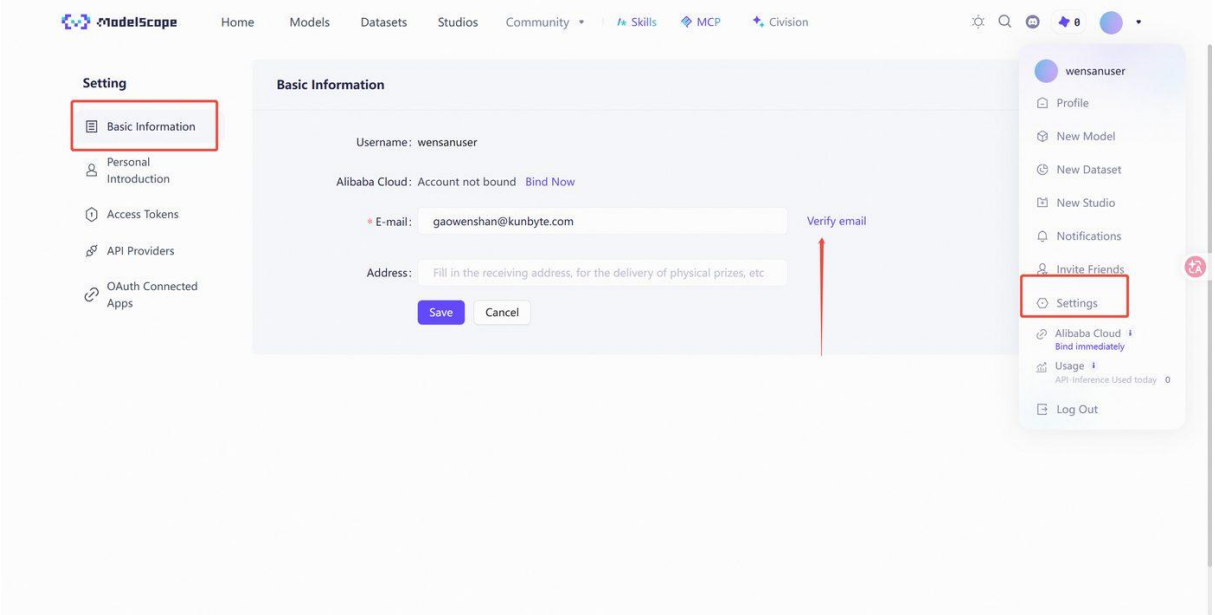

Right after logging in you may see a banner at the top of the homepage: "*For account security, please complete your profile via email verification. ModelScope Magicubics is only available to verified accounts.*" Click **Verify Now** — or reach the same place at any time through your avatar → **Settings** → **Basic Information**.

1. On the homepage, click **Verify Now** in the banner (or open the avatar menu and choose **Settings**).

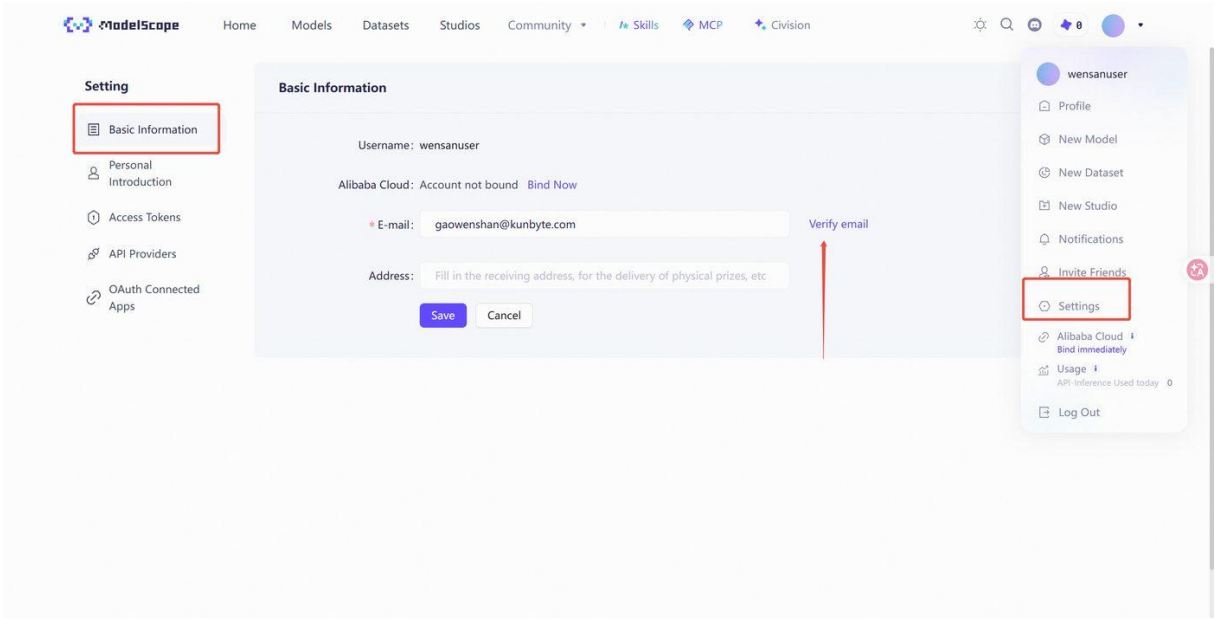

The homepage banner — verification is required before Magic Cubes become available

2. On **Basic Information** you can see your **Username**, the **Alibaba Cloud** binding entry, and your **E-mail**. Click **Verify email** next to the email address. (This page is also where you confirm the username and email you recorded in STEP 1.)

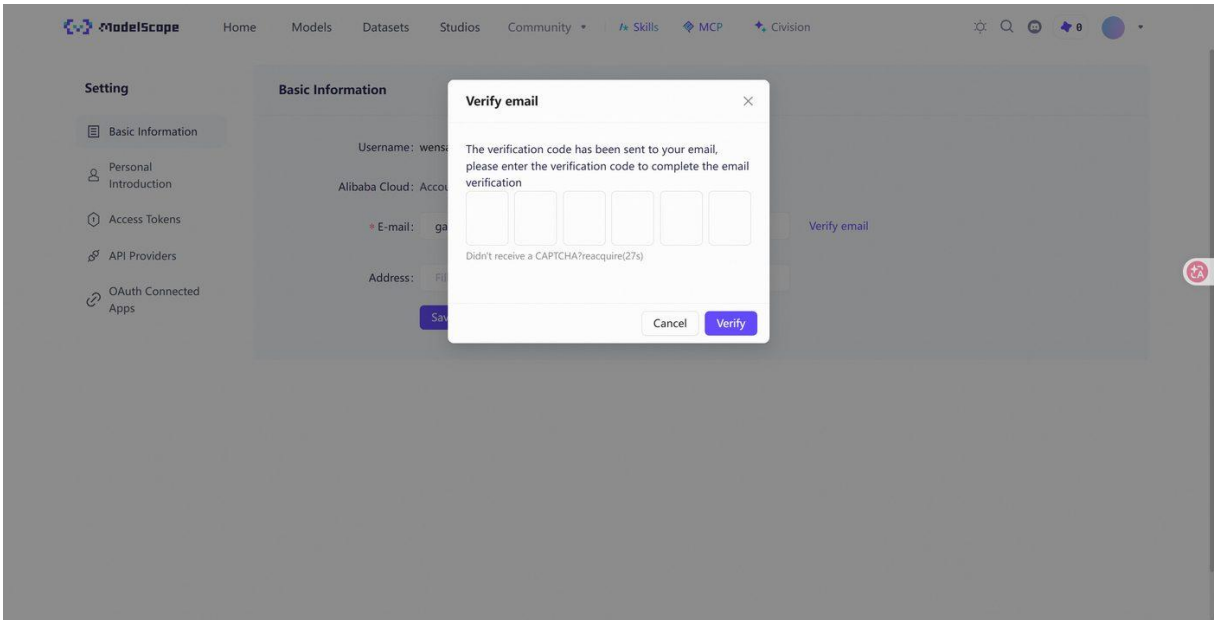

Basic Information — the Verify email link and the Alibaba Cloud binding entry

3. A **Verify email** dialog opens and a 6-digit verification code is sent to your inbox. "*The verification code has been sent to your email, please enter the verification code to complete the email verification.*"

The Verify email dialog — the code has just been sent to your inbox

4. Open the email with the subject **[ModelScope] Your email verification process**: "*Hi, User <username>, your verification code is: 070858. It is valid for 10 minutes.*"

The verification-code email — the code is valid for 10 minutes

5. Type the six digits into the dialog and click **Verify**. If the code has expired, click the resend link in the dialog for a fresh one.

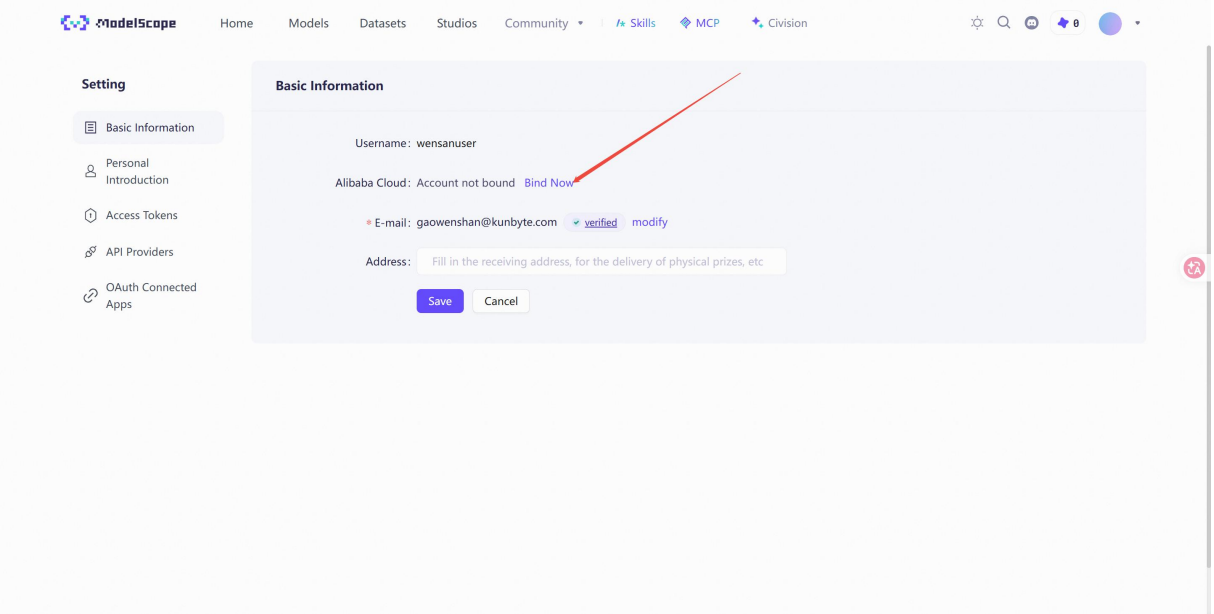

Enter the six-digit code and click Verify

STEP 5 · Confirmed — Now Bind Your Alibaba Cloud Account

Where: Settings → Basic Information, straight after the verification succeeds.

1. A green ✓ **verified** marker appears next to your email address: the account is verified.
   The **Alibaba Cloud** line still shows *Account not bound*, with a **Bind Now** link next to it.

Verified — the email shows ✓ verified, and Alibaba Cloud is ready to be bound

2. Click **Bind Now** and follow the Alibaba Cloud authorization flow. The detailed steps are in the Track 2 student guide, STEP A · *Bind Your Alibaba Cloud International Account*. Once the binding is done you unlock the free cloud resources used by the rest of the competition workflow.

> 💡 Registration is only the first checkpoint. Before you go further, make sure that (a) your email shows ✓ **verified**, (b) the organizers have your **username and email**, and (c) your Alibaba Cloud International account is bound.

Tips & Troubleshooting

- **No activation email?** Check the spam/junk folder, confirm the address you typed, and allow a few minutes. The link can also be re-triggered by trying to log in.
- **Verification code not received or expired?** Codes are valid for 10 minutes. Reopen the **Verify email** dialog and request a new one — each request invalidates the previous code.
- **Signed up with Google / GitHub by mistake?** The organizers need a username and email pair. Register again with email sign-up so that both values exist, and report the account you actually use.
- **Wrong email address?** On **Basic Information** click **modify** next to the address, then verify the new one.
- **Why bother verifying?** Verified accounts are the only ones eligible for Magic Cubes — so an unverified account cannot generate images or videos in the competition.

- **Do I need Alibaba Cloud right away?** No. Register and verify first; the Alibaba Cloud binding comes next and you can create that account during the binding flow.

Quick Reference & Official Resources

Key URLs and the official ModelScope pages — everything in one place.

Item	Value
ModelScope site	`https://modelscope.ai`
Register	modelscope.ai → top-right corner → `Register` (email sign-up: username + email + password)
Log in	modelscope.ai → top-right corner → `Login` (email + password)
Email verification	Avatar → `Settings` → `Basic Information` → `Verify email` (6-digit code, valid 10 minutes)
Alibaba Cloud binding	Avatar → `Settings` → `Basic Information` → Alibaba Cloud → `Bind Now`
What to report to the organizers	ModelScope **username** + **email** (see Table 2)
